**READING**

**A1. Read the following poem carefully: (7)**

To be healthy is a blessing. People pay little attention to health unless they fall ill. This is because they do not pay attention to health. The most important way to have good health is to have balanced nutritious diet. Our diet should include, vegetables, fruits and vitamins. Fried food, sugary stuff and overeating should be avoided. We must take regular exercise as it improves blood circulation and makes a person efficient. Walking is another way of keeping good health. It costs nothing and gives everything useful. Bad habits like smoking. Drinking or taking of drugs should be avoided. Cleanliness should be observed. The garbage which is sometimes thrown outside the houses causes diseases which shorten our lives. So enjoy the book of life.

**Answer the following questions:-**

1. When do people pay attention to health?
2. What is the most important requirement for keeping good health?
3. What type of diet should be eaten?
4. What type of diet should be avoided?
5. How does walking help us to keep good health?
6. Find opposites of the given words:  
curse,exclude,irregular

They contain plenty of vitamins, certain proteins, cellulose and water. Cabbage, carrots, cauliflower, pumpkin, capsicum, broccoli, green beans, spinach, mustard leaves, peas and tomatoes are some of the vegetables which have very great nutritional value.

Vegetables are a delightful way to lighten up a meal, and they combine well with most other food items like cereals and grains. Being, in general, light and moist, they are some of the easiest foods to digest when properly prepared. Researchers have found that regular and more use of vegetables can help in preventing serious health hazards like cancer, heart disease and obesity.

Since vegetables are low in calories and help to lose weight, one should, while increasing the level of activity, escalate their consumption. Vegetables are also low in the kind of fat linked to heart disease and they do not raise cholesterol.

Due to the increased use of pesticides, all the vegetables should be sufficiently washed before cooking. Eating of salads and raw vegetables require more careful cleansing.
